New collections

Design & Technology...

Key-words that summarize the Campa universe

Design and Technology express Campa's commitment to a true scientific approach of experimentation and innovation for creating elegant and highly efficient radiators. Innovation through design requires the mastery of complex parameters for creating sustainable, high-performing and easy-to-use products.

LIVING ROOMS, BEDROOMS...

Campastyle

collection

The finest, most elegant and efficient radiators.

With the clever use of glass, natural lava stone and steel, they show the ultimate expression of “design and technology”

MASSIVE GLASS FACADE

The massive glass facade of Campa radiators reveal a requirement well beyond the mere need for comfort.

This hard-to-master material brings an intense and immediate visual treat.

The massive glass facade is impact-resistant.

Glass Campastyle

Radiant radiator with controlled inertia®

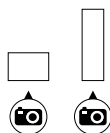

Massive glass facade

Outstanding discretion and elegance of an exceptional range of radiators

FEATURES

- Technical data p.44
- Control box with digital display
- Energy saving functions
- Models: horizontal, vertical

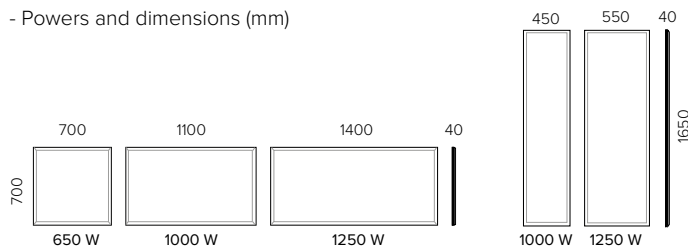

- Displayed models:

- Colours:

- Astrakhan black
- Lily white
- Reflect "mirror effect"

- Powers and dimensions (mm)

- Guaranteed French origin -

Glass Campastyle reflect "mirror effect" vertical

Glass Campastyle astrakhan black horizontal

LAVA STONE

Lava stone is a rare and natural material. It is cut so that it enhances its particular and fascinating nature.

Each panel is unique and supplied with a certificate of authenticity.

Lava Campastyle

Radiant radiator with controlled inertia®
Massive lava facade

Irresistible attraction of the raw stone for your viewing pleasure.

Campastyle raw lava vertical

FEATURES

- Technical data p.44
- Control box with digital display
- Energy saving functions
- Models: horizontal, vertical

- Displayed models:

- Colours:

Greige

- Powers and dimensions (mm)

- Guaranteed French origin -

Campastyle greige horizontal

STEEL

Steel, a seemingly simple material, becomes a source of creativity when shaped: with a smooth or sandblasted surface, white, anthracite, grey or tinted finishes.

Elegance is the key-word of this surprising material.

Campastyle Design

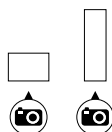

Radiant radiator with soft inertia
Double steel envelope

By nature, steel complies with the most conventional or the most eccentric requirements of a designer.

FEATURES

- Technical data p.44
- Control box with digital display
- Energy saving functions
- Models: horizontal, vertical

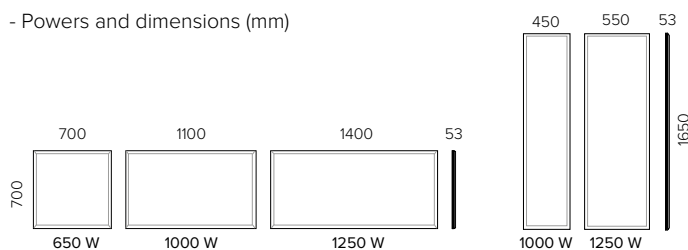

- Displayed models:

- Colours:

- Powers and dimensions (mm)

- Guaranteed French origin -

Campastyle Design white horizontal

Campastyle Design light grey vertical

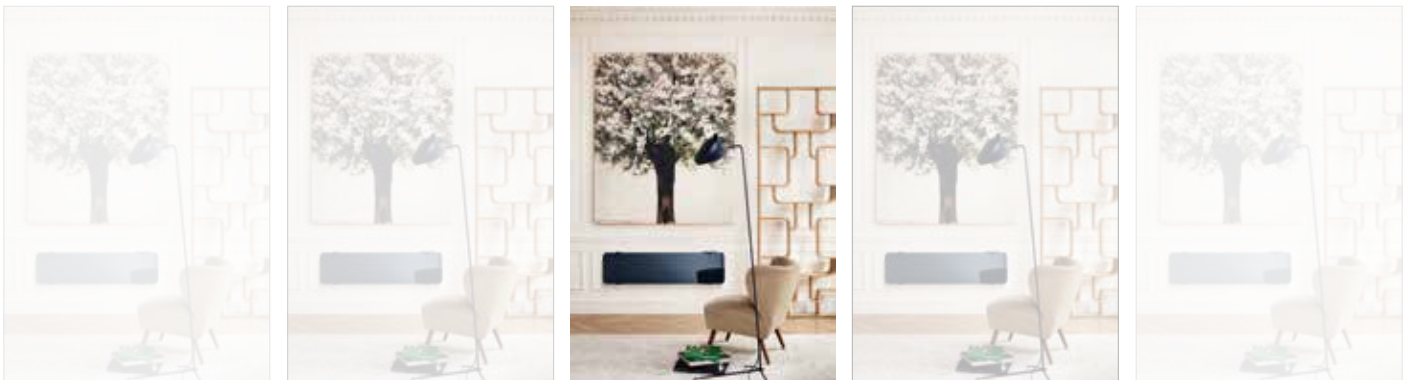

3.0 radiators

The new 3.0 radiators represent a major technological breakthrough.

Design, technological, connected, they inaugurate a new generation of appliances that combine energy efficient operation, comfort, energy savings and care for the environment.

Discover a new technology that uses the intelligence of connected radiators for visualizing and controlling energy consumption.

Clearer viewing means better understanding, for more energy savings.

Campaver Ultime - 3.0

Radiant radiator with controlled inertia®
Massive glass facade - horizontal

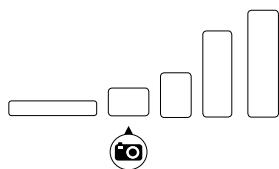

Campaver Ultime: a unique design combining technological know-how and a glass panel with elegant soft lines.

The massive glass facade is impact-resistant.

FEATURES

- Technical data p.45
- Control box with digital display Smart ECOcontrol®
- Energy saving functions
- Models: narrow horizontal, vertical, narrow vertical, angle model

- Displayed models:

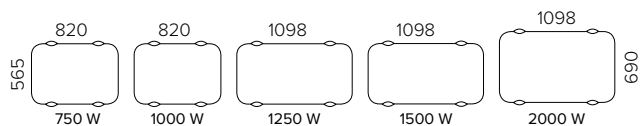

- Colours:

Jobel 3.0 white vertical

Jobel 3.0 white low

CAMPA
Les radiateurs d'exception

Jobel 3.0 white horizontal

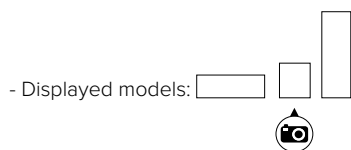

Campalys - 3.0

Radiant radiator with controlled inertia®
Steel facade with inside inner crystal heating element

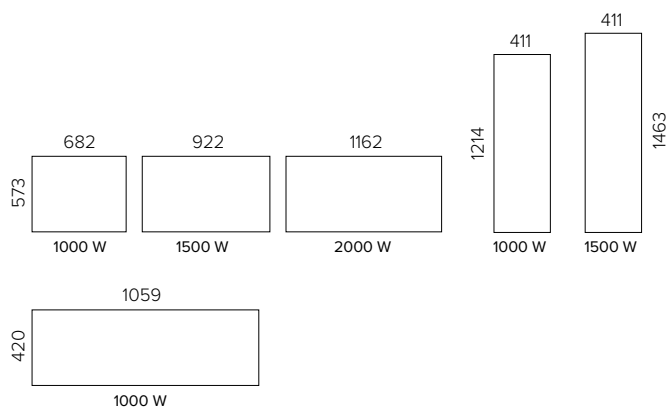

The innovative design of the Campalys gives an amazing impression of beauty and novelty. A watchful eye discovers a curved facade like a sail inflated by the wind.

FEATURES

- Technical data p.47
- Control box with digital display Smart ECOcontrol®
- Energy saving functions
- Models: horizontal, vertical, low

- Colour: White
- Powers and dimensions (mm)

- Guaranteed French origin - 

Campalys 3.0 white horizontal

Ravil - 3.0

Radiant radiator with controlled inertia®
Steel facade - soft heat

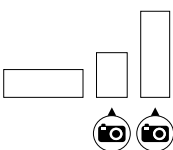

Each Campa radiator is more than a simple heater. The Ravil reflects the company's recognized know-how and creativity in design.

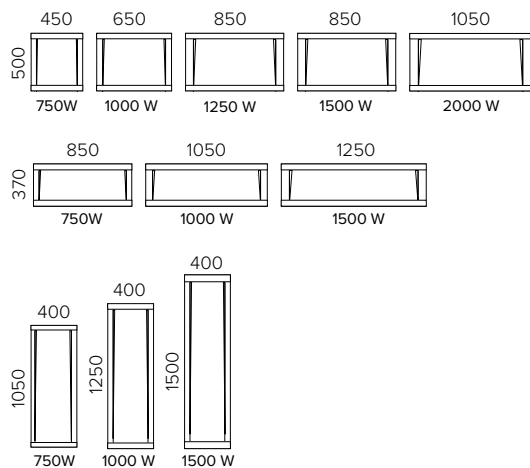

Ravil 3.0 white horizontal

FEATURES

- Technical data p.48
- Control box with digital display Smart ECOcontrol®
- Energy saving functions
- Models: horizontal, vertical, low

- Displayed models: 
- Colour: White

- Powers and dimensions (mm)

- Guaranteed French origin - 

Ravil 3.0 white vertical

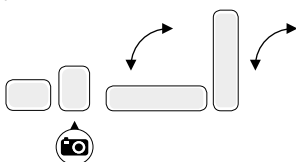

Cosmos Soleil - 3.0

Full radiant panel

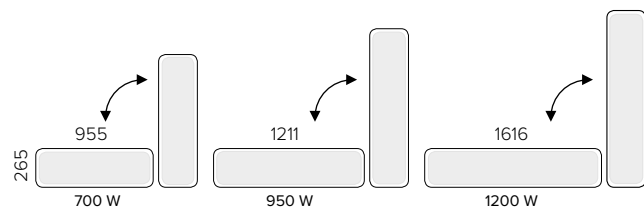

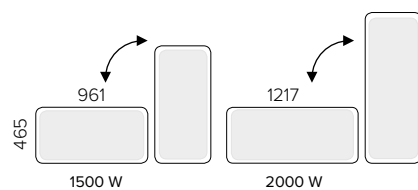

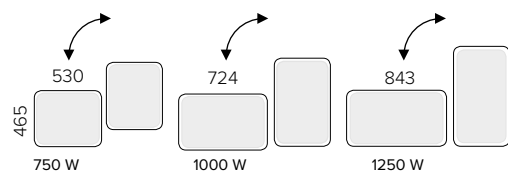

A clever and unique solution for multi-dimensional and multi-position applications.

FEATURES

- Technical data p.48
- Control box with digital display Smart ECOcontrol®
- Energy saving functions
- Models: classic, very narrow

- Displayed models: 
- Colour: White

- Powers and dimensions (mm)

- Guaranteed French origin -

Cosmos Classic white

3.0 radiators – a new range of smart radiators

A technological advance in the field of modern electric heating.

User friendly.

Just press this button for an automatic control of comfort:

Energy saving functions

- Programming facility
- Presence and absence detector
- Open window detector
- Behavioural indicator
- Child lock
- Smart ECO control® compatible

Smart ECO control® matches 4 main functions that are integrated in each radiator:

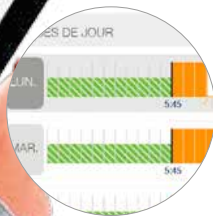

- High-performing radiators in each room,
- Manual or automatic control facilities,
- Clear and full information,
- An optional communication kit for creating an eco-efficient system of connected heating, upgradeable and that can be controlled room per room with a smartphone, computer, or tablet.

The optional communication kit enables

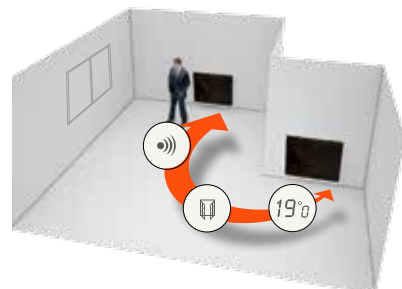

> CONTROL WITH A SMARTPHONE, COMPUTER, TABLET...

It enables visualizing consumption, to plan and to set comfort as desired and save energy.

> CREATE A COMMUNICATING SYSTEM BETWEEN THE RADIATORS.

Their set temperature is homogeneous. Their sensors communicate for optimizing comfort and maximizing energy savings

The Timeless collection

Thanks to its know-how, Campa released two models offering both classic and contemporary lines. Steel is an inspiration for designers and an inner massive glass panel brings comfort to your home.

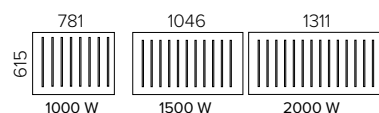

Titan

Radiant radiator with controlled inertia®
Steel facade – inner massive glass panel

Sober and discreet design for a radiator with resolutely contemporary lines.

FEATURES

- Technical data p.50
- Control box with digital display
- Energy saving functions
- Model: horizontal
- Colour: White
- Powers and dimensions (mm)

- Guaranteed French origin - 

Titan white horizontal

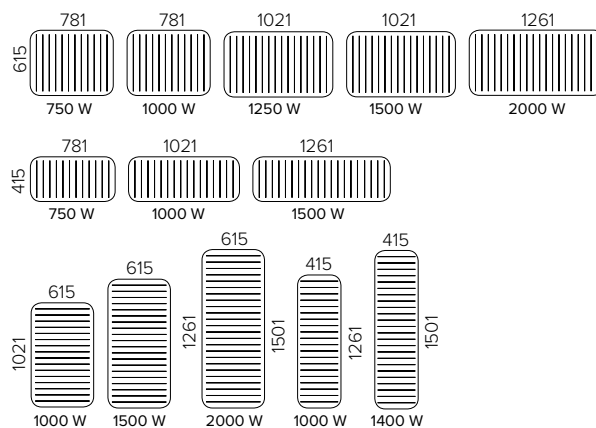

Altea

Radiant radiator with controlled inertia®
Steel facade – inner massive glass panel

The Altea model is both the most conventional and one of the most modern designs of the Campa collection. Rounded and straight lines creates an eternal emotion.

FEATURES

- Technical data p.49
- Control box with digital display
- Energy saving functions
- Models: horizontal, vertical, narrow horizontal, narrow vertical
- Colour: White
- Powers and dimensions (mm)

- Guaranteed French origin -

Altea white horizontal

CAMPA

Luxury radiators

The bathroom collection

Our bathroom collection presents technological requirements developed to fit with large, medium and small spaces, reduce the occupied volume with a perfect comfort.

Campastyle Elite

Fan assisted radiant towel dryer radiator
Massive glass facade

Elegance, design, technology, high efficiency, space saving,
high-performing, discreet booster fan... perfection!

Campastyle Elite Lily white

A recognized know-how that brings you the best of technology and design for 50 years

Campa is a French company at the forefront of innovation in the areas of creation and development of modern electric radiators. Designed and developed in our factories located in France (guaranteed French origin label – Bvcert 6020118), our appliances associate design and technology for an immediate aesthetical pleasure and best comfort. Each collection reveals innovative, intelligent, elegant, environmentally friendly and high-performing radiators.

Campa is part of the Muller Group, specialist of thermal solutions for residential, commercial and industrial fields.

A major industrial actor of the energy transition, Muller benefits from the expertise of the companies of the Group, and from the Campa company in particular, for building the energy future in France and everywhere in the world.

Campa technologies and design have been awarded

Since 2012, several labels and trophies have been granted to Campa regarding the performance of the innovative technologies that are fitted to its radiators and the design of its various ranges.
